

## *Travel Guidelines ~ Update 2/18/21*

- If you are **flying** somewhere and planning to attend a **highly populated area** (theme park etc..) or gathering with 20 or more people that you are not in contact with on a daily basis, you will be asked to isolate/quarantine for **5** days. Day 1 will begin on the first day after you have returned home.
- If you are **flying** to a more **private location/secluded destination** somewhere and you are going to private location/home and will be secluded from others, you will be asked to isolate/quarantine for **2** days. Day 1 will be your first after you have returned home.
  - If you chose to get a COVID test after you return from traveling and the results are negative you will still need to complete the isolated period listed above.
  - **IF** a person develops any COVID like symptoms or tests for COVID after returning, you may be asked to isolate/quarantine Isolation/Quarantine could range from 10 – 24 days.
- If you are **driving** to a **highly populated area** or gathering with 20 or more people that you are not in contact with on a daily basis, you will be asked to quarantine for **3** days. Day 1 will begin on the first day after you have returned home.
- If you are **driving** to a more **private location/secluded destination** you will be asked to carefully monitor your symptoms once you return.
  - If you chose to get a COVID test after you return from traveling and the results are negative you will still need to complete the 14 days of isolation.
  - **IF** a person develops any COVID like symptoms or tests for COVID after returning, he/she will be asked to immediately isolate and carefully monitor symptoms.
- If your child/ren have had a positive test result within the 90 days of traveling they will not need to isolate the given number of days stated above.
- If you have received a COVID vaccination (pertains to staff) you will not need to isolate as stated above unless you demonstrate any COVID like symptoms after returning.
- Zooming into the classrooms will only be used for time that one is isolated/quarantined.

As the restrictions begin to lighten up please know that we will want to continue to stay proactive. In order to do this please continue to keep your child home if he/she is experiencing any ill-like feelings. If your child is at school and demonstrates any ill-like symptoms we will send him/her home immediately. With the restrictions lightening up we still want to be vigilant.

If you have any questions, please do not hesitate to reach out to me and I will do my best to provide you with or find the correct answer for you.

Mrs. Tracy Bertrand Sigurdson
